WHS and Environmental Management

The management at GBE Group places the highest priority on the promotion of a healthy and safe work environment and on the prevention of injury through its constantly reviewed WHS & E Management System.

Our WHS & E Management System provides a framework for managing work, health, safety and environmental issues across the organisation to ensure that processes are in place to eliminate or minimise injury, illness and environmental harm, and to improve performance in all aspects of safety and environment.

The WHS & E management system is based on the principles and requirements of the national/international standards AS/NZS 4801 (WHS Management Systems) and ISO 14001 (Environmental Management Systems). The WHS & E system is also designed to integrate with key components of GBE groups Quality Management system which has been certified to the requirements of ISO9001:2020 as there are many activities that are common to both.

Currently GBE Group has its systems audited yearly by CM3 Contractor Accreditation and by Master Electricians Accreditation.

safe work australia

Award Winning, Gold Accredited Master Electricians

Master Electricians are the best in the business. By choosing a Master Electrician you are choosing a quality electrical contractor who has proven they have the experience to provide you with a safe, energy efficient solution for your home or business.

When safety cannot be sacrificed, a Master Electrician can deliver.

Master Electricians is an accreditation program provided by Master Electricians Australia Ltd. Members of the program, Master Electricians, are accredited to deliver the highest standards of quality, electrical safety, energy efficiency advice, and integrity.

They are experienced, safe and informed electrical contractors who offer customers a 12-month guarantee on their workmanship. GBE has recently been awarded a gold level accreditation, the highest level of accreditation that can be acquired.

Electrical Contracting

GBE Group provides contracting services to domestic, commercial and industrial customers including:

- Authorised Level 2 Service Provider Works
- Switchboard and power upgrades
- Service aerials and private poles
- Electrical contracting installation and repairs
- Compliance testing and reporting
- Emergency lighting
- Test tagging

We provide services to residential, commercial, government and institutional customers ranging from small to large repairs and installations.

Our commercial electrical works include the maintenance, repair and reporting for statutory compliance for emergency lighting, test tagging, RCD testing, switchboard thermal imaging & generator maintenance.

We provide reactive service works and preventative maintenance plans ensuring optimal performance of your equipment. We offer prompt service by experienced technicians and value for money pricing. With over twenty years of continuous operation and experience in the service industry, GBE Group will look after you.

Domestic

GBE Group provides services to residential customers with works ranging from small repairs and installations including safety switches, ceiling fans and smoke detectors through to complete rewires, new installations, repairs and alterations to mains entry points and power supply upgrades.

GBE Group is a Level 2 Service Provider for Ausgrid and we are Category 1, 2, 3 and 4 accredited allowing us to provide metering, point of attachment service aerial and underground service lines.

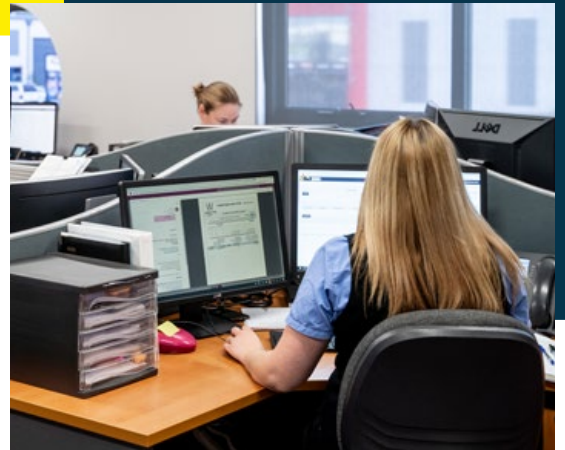

Commercial

GBE Group provides services to commercial customers including small breakdowns and installation works through to complete renovations, new commercial installations, new switchboards and building automation.

Our commercial electrical works include the maintenance of statutory compliance for emergency lighting, portable appliance testing and tagging, RCD testing, switch board thermal imaging, generator maintenance, and HV switching.

We are licensed and experienced to carry out data and telephone cabling and testing.

Industrial

GBE Group provides services to industrial customers including new installation works, repair and maintenance to all plant and equipment, preventative maintenance and safety inspections on fixed and portable equipment.

We provide technical service and support of process systems and control including the design of new control systems to meet client requirements.

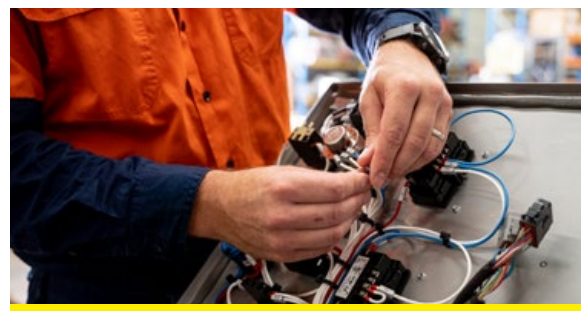

Building Facility Services
