

Solar Maintenance

Preventative and reactive maintenance for commercial, industrial and utility-scale solar systems, maximising performance, reliability and asset life.

- Preventative & reactive maintenance programs
- Panel inspection & condition reporting
- Inverter testing & maintenance
- Thermal imaging inspections
- DC/AC electrical & string testing
- Switchboard & protection system inspections
- Fault finding & rectification
- Monitoring, reporting & performance analysis
- Cleaning & vegetation management coordination
- Emergency breakdown response

GBE Group brings over 35 years of electrical maintenance experience to every solar maintenance program, backed by qualified, licensed technicians and ISO 9001 certified work practices.

From rooftop commercial installations to utility-scale solar farms, our team delivers safety-focused, fully documented maintenance you can rely on, with fast response when it matters most.

Contact GBE Group today to discuss a tailored solar maintenance program and ensure your solar assets continue operating at peak performance.
